Harvest Power Named a 2010 Global Cleantech 100 Company
Selected by global panel of leading energy experts

WALTHAM, MASS, October 14, 2010 – [Harvest Power](#), Inc., a developer of next-generation organic waste recycling facilities, today announced that it has been named in the prestigious 2010 Global Cleantech 100, produced by the Cleantech Group, providers of leading global market research, events and advisory services for the cleantech industry. The list is produced as part of the Global Cleantech 100 program, run in collaboration with the Guardian News and Media and sponsored by Autodesk.

The Global Cleantech 100 highlights the most promising private clean technology companies from all around the world, focusing on companies that are the most likely to make the most significant market impact over the next 5-10 years, in the eyes of the world's cleantech experts.

The list is compiled by the Cleantech Group, which draws on its own data and research and combines it with the weighted qualitative judgments of both hundreds of cleantech industry insiders and the viewpoints of a 60-strong, international expert panel. To qualify for the list, companies must be independent, for-profit, cleantech companies that are not listed on any major stock exchange.

4,616 nominations were received from 3,260 unique sources, producing a finalist list of 3,138 companies drawn from 50 countries. 218 companies were presented to the expert panel for final input. The end result was 100 companies from 14 countries.

The 60-strong expert panel is drawn from well-respected organizations in cleantech innovation from around the world, including leading investors such as Emerald Technology Ventures, Generation Investment Management, Kleiner Perkins Caulfield & Byers, New Enterprise Associates, SAM Private Equity, Sequoia Capital and VantagePoint Venture Partners. The panel also includes a wide variety of corporations from many different industries, such as BASF, GE, Honeywell, IBM, Procter & Gamble, Siemens and Veolia.

"Harvest Power is proud to be selected as one of the world's leading cleantech companies, and we are honored to be included in the Global Cleantech 100 list." said Paul Sellew, founder and CEO of Harvest Power. "We look forward to continuing the strong momentum we have experienced to date and moving forward with other leading cleantech companies."

The full list of Global Cleantech 100 firms is available online, on the websites of the Cleantech Group (<http://cleantech.com/GlobalCleantech100.cfm>). and the Guardian (<http://www.guardian.co.uk/globalcleantech100>).

About Harvest Power

Through innovative technologies and unparalleled industry experience, Harvest is ushering in a new era of organics recycling. Harvest develops, builds, owns and operates state-of-the-art facilities that produce

renewable energy and compost from discarded organic materials. Deploying best-in-class technologies, Harvest provides capital for projects and top-tier talent to finance, engineer, construct and operate the facilities. By harnessing the energy and nutrients of organic materials, Harvest enables communities to increase their energy independence, reduce their environmental impact, and harvest valuable resources.
